The **US-China Business Council** has urged the Chinese Government to loosen its **cybersecurity** rules with the adoption of a narrower definition of 'national security' in order to widen **internet**, cloud and technology **access** and trade.

The newly established **cybersecurity** agency in **Indonesia** is set to recruit a vast number of staff as its looks to set its ambitions high. The agency is still not clear on whether it will be able to prosecute, but it aims to identify the criminals and crimes.

Following the passing of a Bill in the **Singaporian Parliament** this week, a new head of **cybersecurity** will be given significant powers. They will be able to access **information** that would otherwise be confidential, from organisations in order to carry out investigations.

A number of countries and companies outside of the **EU** are still failing to see full compliance with the incoming **GDPR**. **EY's** report on the issue revealed that just 33% of countries and companies are currently compliant and ready for the **data protection** and **privacy regulations** that will be in place within a few months.

The **European Dialogue on Internet Governance** conference will be held in **Georgia's** capital this year. It will provide a platform to allow officials and states to plan on better governance and standards for the internet in **Europe**.

The **Safer Internet Day Programme** launched around the world this week is aiming to promote the safer use of internet for young people. The programme developed from an agreement between the **European Commission** and **Homeland Security** that will address, amongst other things, **cyber issues**.

The **Polish Government** and the **International Telecommunication Union** (ITU) have collaborated to map out the ICT infrastructure in the nation. The collaboration will allow for Poland to understand the current connectivity to the **internet** in the nation and develop new initiatives to **broadband access**.

Plans for a new **cyberspace** and **digital economy** bureau have been set in motion by **Rex Tillerson**, Secretary of State. It aims to unify a number of offices that have remit over **cyber issues** and to tackle the ever rising issue of attacks.

A bill imposing **net neutrality** restrictions on **internet service providers** has been passed by the Senate. Despite its passing, electronic rights group the **Electronic Frontier Foundation** have suggested that it could be thrown out by the courts.

Google has launched a programme for a number of schools in **Nigeria** to promote the safer use of the **internet**. It will aim to educate people on the risks of and on the Internet and how they can better use it in a safer way.

Following reports that a large percentage of **Nigeria**, over 50% of the population, does not have access to the Internet, The **Internet Society** has outlined new plans to increase **internet access**.

The **European Commission** has published its implementation regulation for the **NIS Directive**, **ENISA** has highlighted its contribution to the formation of these regulations and their implementation.

European Dialogue on Internet Governance to Be Held in Georgia

The European Dialogue on Internet Governance conference will be held in Georgia's capital this year. It will provide a platform to allow officials and states to plan on better governance and standards for the internet in Europe.

"Georgia's capital Tbilisi is to host the European Dialogue on Internet Governance (EuroDIG) 2018 on June 4-6.

The information was released by Georgia's Ministry of Economy and Sustainable Development, which says that the preparatory meeting was held in Technopark, attended by the representatives of the Ministry of Economy, the EuroDIG, the International Internet Community (ISOC) and the International Organization for Domain Names (ICANN)."

EU data protection law may end up protecting scammers, experts warn

Raj Samani chief scientist at McAfee has warned that the introduction of GDPR in May, could actually protect scammers and those that misuse the internet, arguing that the regulations will end the important transparency currently in place on the internet.

"Sweeping new European data protection regulations may have the accidental effect of protecting scammers and spammers by killing the WHOIS system used to link misdeeds online to real identities offline, security experts have warned.

The General Data Protection Regulation (GDPR), which comes into effect in May, contains a raft of measures intended to strengthen data protection for Europeans. But some of the new rights and responsibilities will conflict with decades-old technologies that have provided much-needed transparency on the internet, says Raj Samani, the chief scientist at cybersecurity firm McAfee."

International Crackdown On Anti-Spyware Malware

A UK-led operation has successfully ended a hacking tool widely used by cybercriminals. It formerly allowed attackers to get control over a computer, but the UK National Crime Agency successful removed the Remote Access Trojan.

"A hacking tool allowing cybercriminals to remotely and surreptitiously gain complete control over a victim's computer is no longer available as a result of an UK-led operation targeting hackers linked to the Remote Access Trojan (RAT) Luminosity Link. This case was investigated by the South West Regional Organised Crime Unit and coordinated by the UK National Crime Agency with the support of Europol, this operation saw the involvement of over a dozen law enforcement agencies in Europe, Australia and North America."

FIC 2018: European cyber-security cooperation will endure post Brexit

The director of France's cybersecurity agency has suggested that cybersecurity defences should go beyond the national level. He believes that while France has a duty to tackle cyber risks, so to do the European Commission and other groups within Europe, to work together on the issue.

"Guillaume Poupard, director general of ANSSI (Agence Nationale des Systèmes d'Information), France's cyber-security agency - an equivalent of the UK's NCSC but one which reports directly to the French Prime Minister - told SC Media UK during FIC 2018 that while cyber-security is a matter of national sovereignty, it should not stop at this level. "Cooperation between States is absolutely essential.

Within Europe, the European Commission and the different Member States are really keen to work together to develop cyber-security. At the European level he emphasises the need to put a cooperation network in place, currently underway with the European Agency (ENISA)."

UK's Snoopers' Charter 'inconsistent with EU law' says Court of Appeal

The EU Court of Appeal has found that the UK's 'Snoopers' Charter' is unlawful. The Act passed in 2014 allowed the UK Government to carry out vast surveillance and data collect operations in order to investigate crimes.

"Earlier this week the Court of Appeal found the UK's Data Retention and Investigatory Powers Act 2014, commonly known as the Snoopers' Charter, unlawful as far as the prevention, investigation, detection and prosecution of serious crimes are concerned.

The Data Retention and Investigatory Powers Act was passed in 2014 to enable the government to carry out mass surveillance and to collect data belonging to citizens to prevent or investigate serious crimes in the UK."

Government must hurry to recruit digital skills needed for Brexit, says PAC

A mass digital skills shortage is set to hit the UK as it prepares to leave the EU, according to the Public Accounts Committee. It reported that a robust plan is not in place to offset any issues.

"The government skills shortage, including the lack of digital skills, must be addressed to support the UK's exit from the EU, the Public Accounts Committee (PAC) has found.

<u>The PAC report</u> on exiting the EU said the civil service needs to address the lack of skills urgently, pointing out that the current process has been "too slow". "The Department for Exiting the European Union and the Cabinet Office do not have a robust enough plan to identify and recruit the people and skills needed quickly," the report said."

State Dept. Reverses Course, Plans to Launch Cyber and Digital Economy Bureau

Plans for a new cyberspace and digital economy bureau have been set in motion by Rex Tillerson, Secretary of State. It aims to unify a number of offices that have remit over cyber issues and to tackle the ever rising issue of attacks.

"Secretary of State Rex Tillerson plans to launch a new cyberspace and digital economy bureau, seemingly reversing course under congressional pressure after he shuttered the department's cyber coordinator's office in August.

Tillerson announced plans for the new bureau in a letter to House Foreign Affairs Chairman Ed Royce, R-Calif., delivered in the middle of a Tuesday hearing on cyber diplomacy issues. Among the witnesses testifying at that hearing was the department's ousted cyber coordinator Chris Painter."

How Code for America, and a Lot of Partners, are Working to Smooth Out Kinks in the Safety Net

Code for America is working towards developing software to help data privacy and safety. Despite their hopes, developments have been difficult with data, privacy and security issues being more challenging than first thought.

"Not surprisingly, when it comes to government technology, integrated benefits enrollment is more a lofty goal than a reality. Yet it's a challenge that Code for America (CfA), which matches cities with software developers to solve a problem, has decided to tackle.

CfA is working with the Chan Zuckerberg Initiative, the philanthropic organization started by Facebook's co-founder and his wife, as well as with the tech startup Nava, the Centers for Medicare and Medicaid Services, the U.S. Department of Health and Human Services, and the state of Michigan. CfA hopes to strip out the complexity — and cost — that gives online benefits enrollment such a bad name. The goal then is to design a simple way to enroll people who are eligible for both Medicaid and food stamps."
