

WORLD BANK GROUP

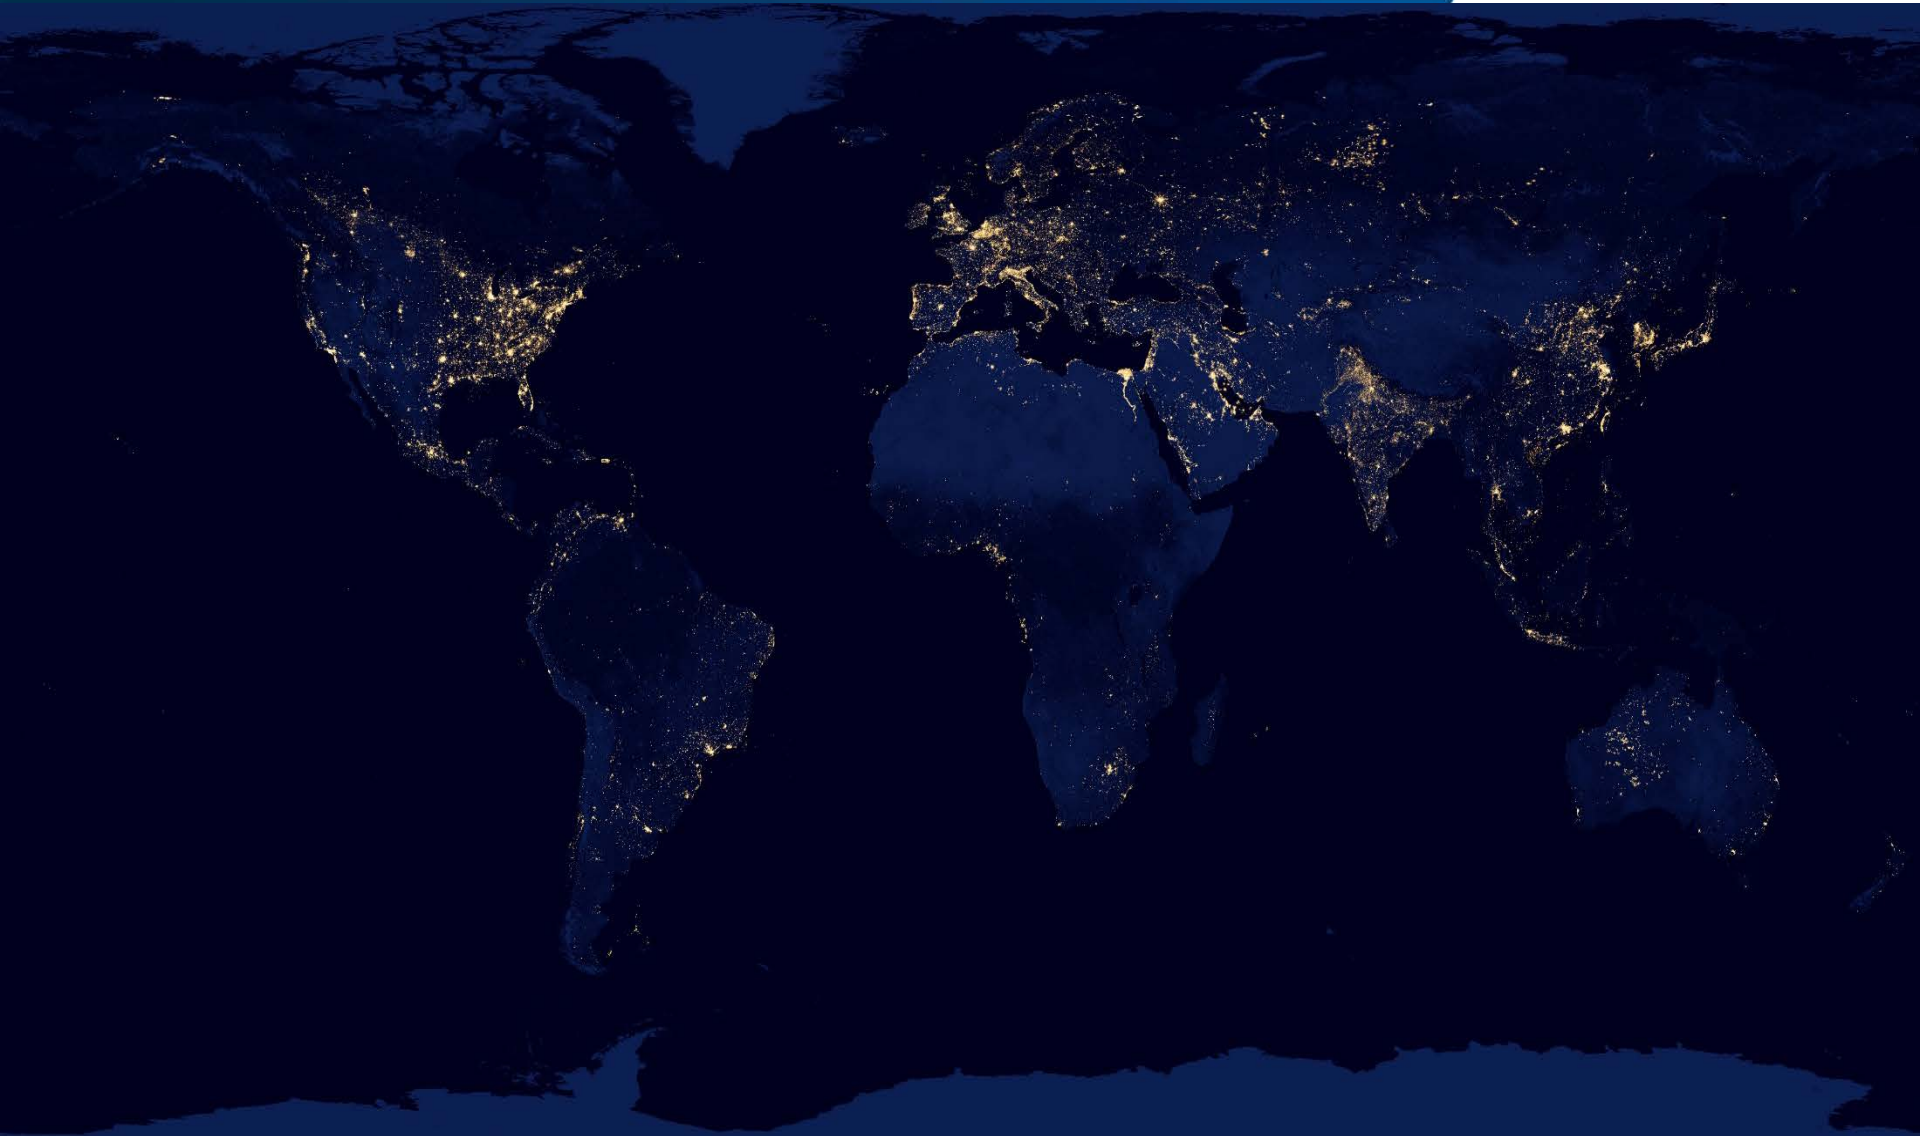

USAID
FROM THE AMERICAN PEOPLE

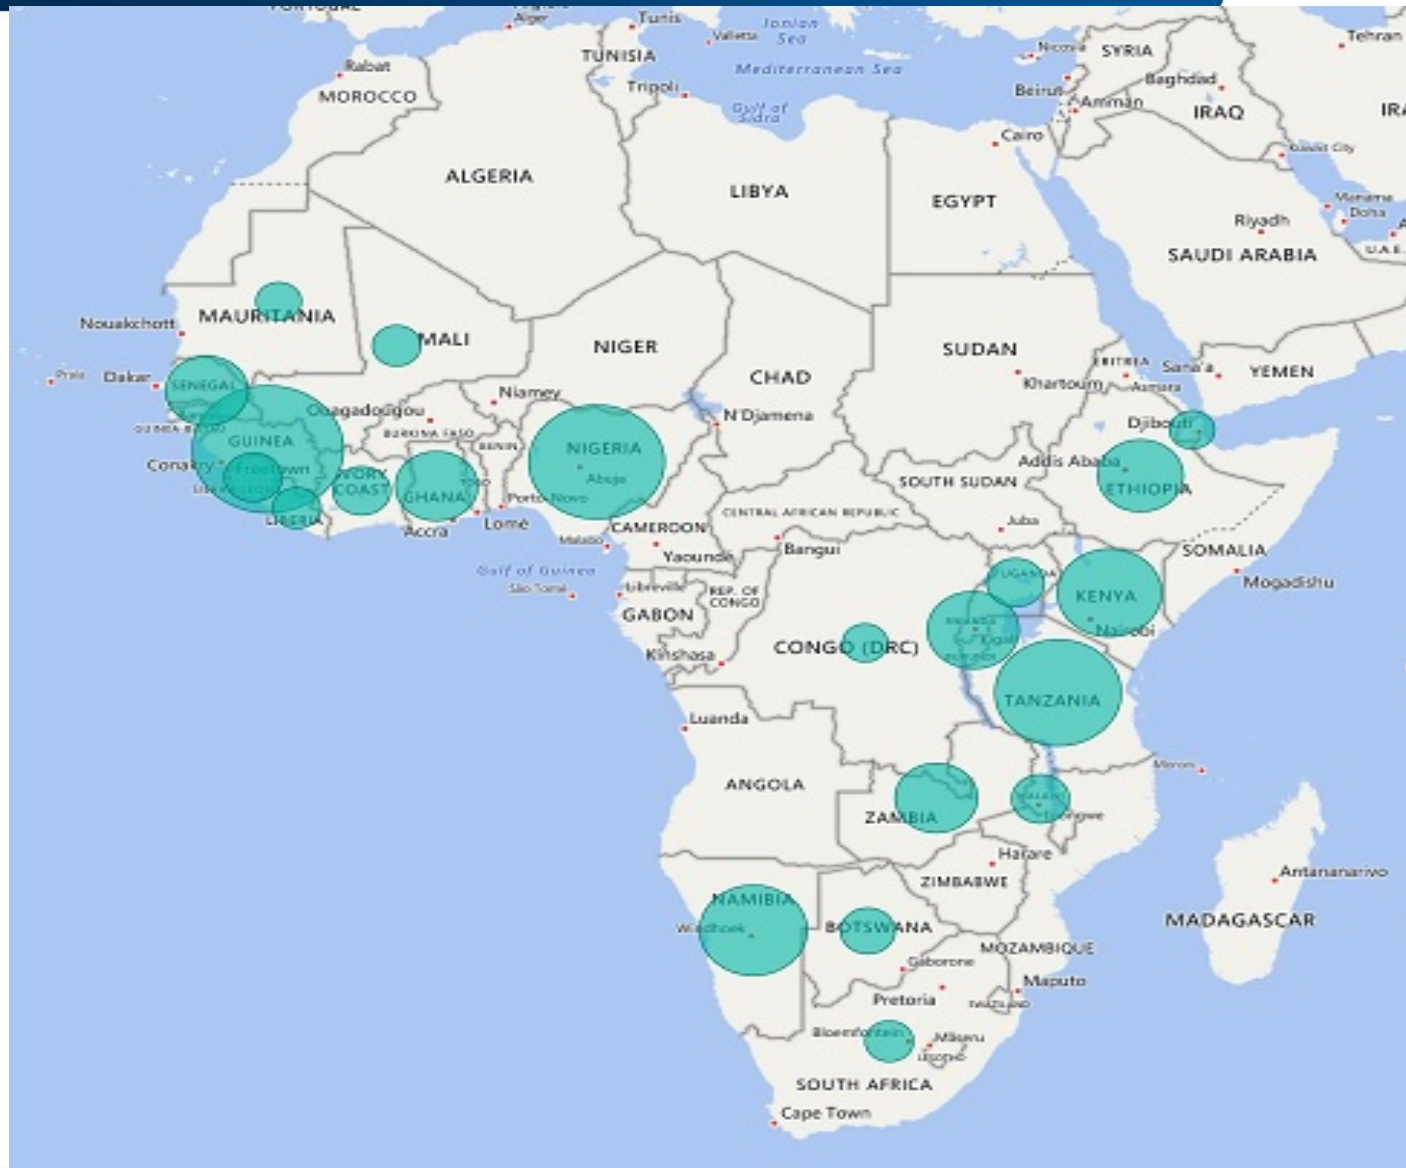

verio**own**
the human global energy network

4 billion without internet, 1 billion without electricity

USAID-led Power Africa

THE GLOBAL GOALS

For Sustainable Development

Harvesting Actionable Data

When farmers employ the latest technologies, they improve crop yield, resource management and sustainability.

Public-Private Partnership between USAID, Microsoft, & the Government of the Philippines

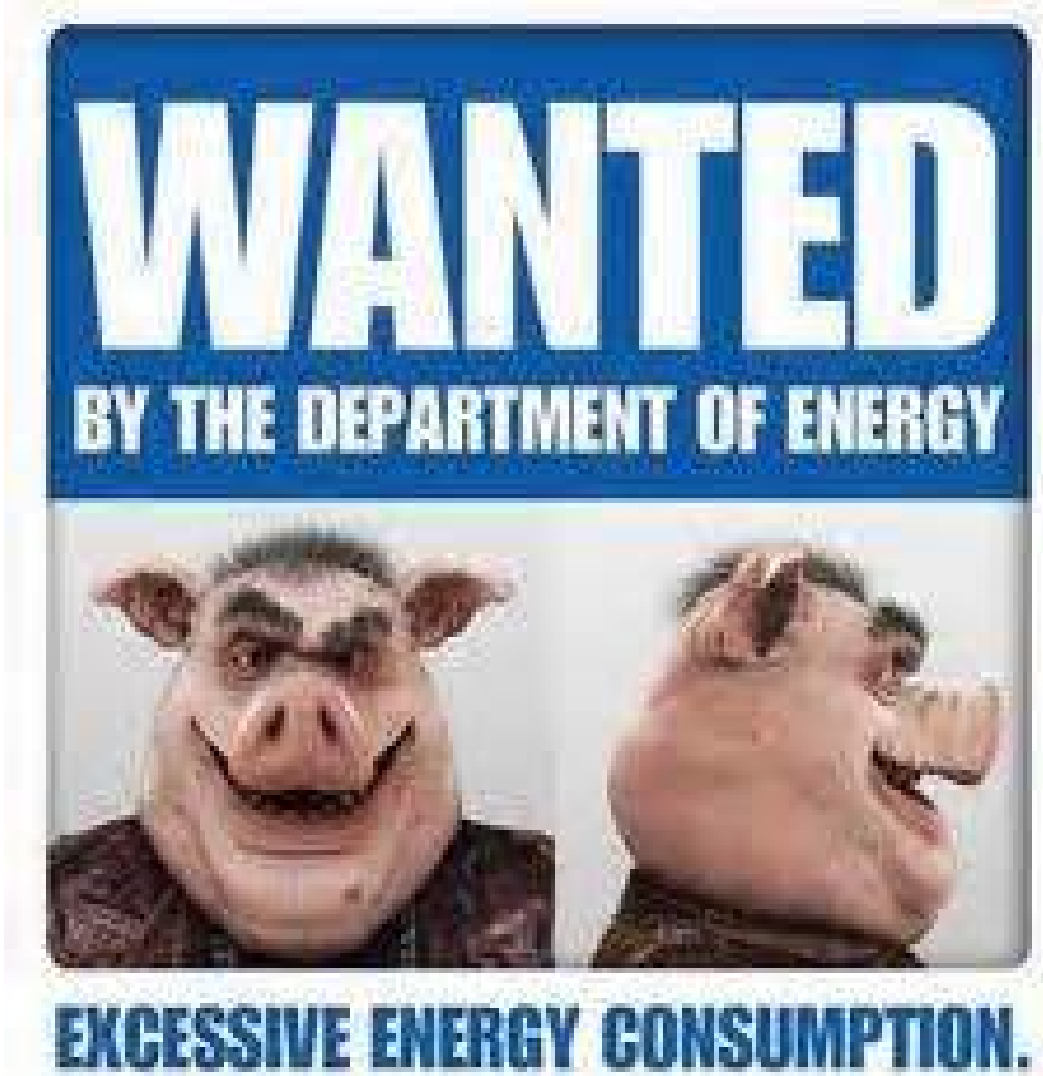

“Build once” approach saves money & the environment

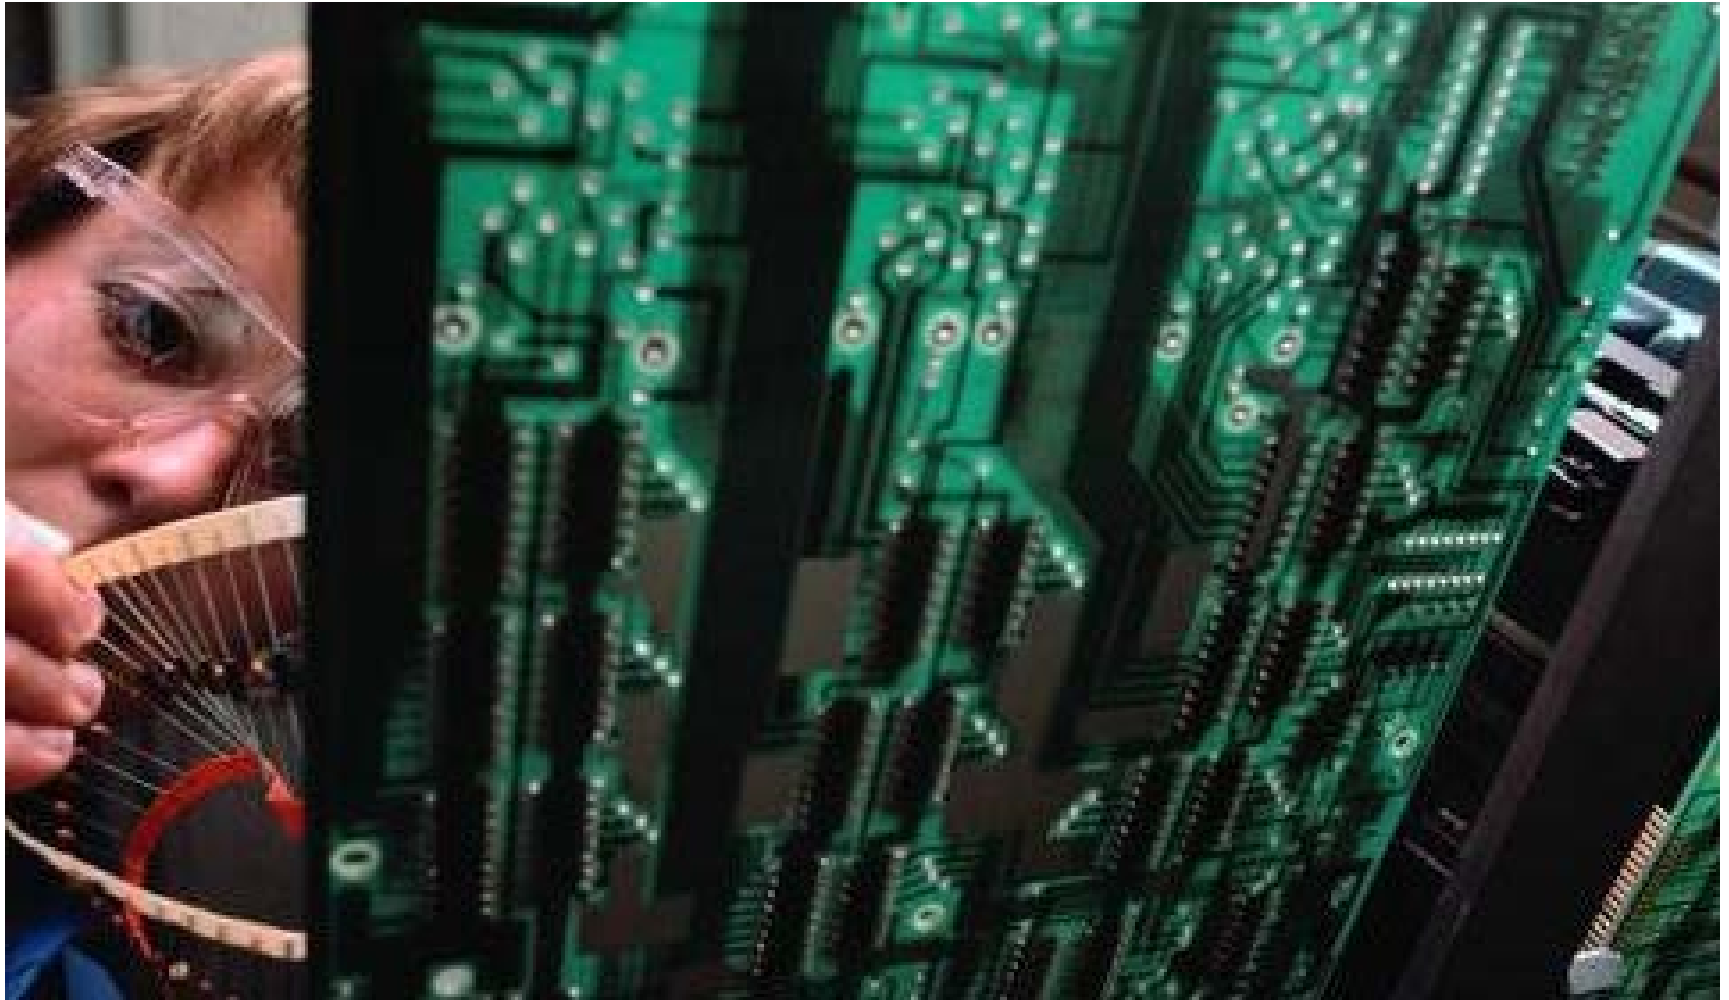

According to the Federal Highway Administration, “90 percent of the cost of deploying broadband is when the work requires significant excavation of the roadway.”

10% of all electricity used for internet

Smart Grid, Smart Everything

Konza Tech City in Kenya

To Do List

- Make development case for internet access
- Map energy and internet infrastructure
- Develop a **build-once** approach to infrastructure
- Establish future models for infrastructure & leapfrog
- Integrate internet across sectors/global goals
- Maximize **public-private partnerships**

Pelé 
@Pele

 Follow 

I was named Edson, after Thomas Edison, because electricity had just been introduced to my hometown in Brazil when I was born.
