**NATO** has begun to draw up **cyber warfare** principles after announcing that **cyber-attacks** to bring down enemy networks could be more effective than air strikes.

The European Union Agency for Network and Information Security (**ENISA**), has held its first industry focused event with stakeholders from across the **EU** to discuss how businesses can transform their **cybersecurity** work.

The **UK** Government have announced possible changes to the **Investigatory Powers Act** which would strip senior police officers of their power to access electronic communication channels, to bring the, “**snooper's charter**” in line with **EU law**.

**Privacy** watchdogs from across the **EU** have warned that the **US** needs to appoint an independent ombudsperson, who can manage data complaints by EU citizens, before 25th May 2018 to maintain the current **Privacy Shield**.

Representatives from the House **Homeland Security** Committee have warned that citizens should get comfortable with the fact that their personal information already has or will be compromised, because of constant **data breaches**.

Top executives from **Facebook** and **Apple** Inc. attended the **World Internet Conference** in **China** for the first time to hear the Chinese Government vow to open its **internet**.

To support **net neutrality** in Nigeria, the **Nigerian Communications Commission** (NCC) is increasing its efforts on the code of practice for the internet. The code aims to ensure that consumer's rights are protected online, and that malpractice is minimised.

**ICT** Ministers across nations in the **African Union** have highlighted the importance of **cybersecurity** and **digitisation** at a recent meeting of the Union.
A report has found that the Ethiopian Government targeted advocates of the Oromo ethnic group across 20 countries, by hacking into their computers and tracking journalists with spyware software.

The United States and India are preparing to start collaborating in the next few weeks to jointly deal with cybersecurity threats and offensive cyber operations.

The Indian Government have accepted new net neutrality recommendations from telecom regulator Trai, however there has been no indication as to when these recommendations could be converted into legislation.

A partnership between Liquid Telecom and The Innovation Village has been formed to aid internet and technology start-ups in Uganda. The partnership is in response to recent calls for greater internet access and availability for those in the nation.

**Government puts forward changes to surveillance law in light of ECJ ruling**

The UK Government have announced possible changes to the Investigatory Powers Act which would strip senior police officers of their power to access electronic communication channels, to bring the, “snooper’s charter” in line with EU law.

“The government has launched a consultation into changes to the Investigatory Powers Act that have been proposed in a bid to make the legislation compliant with EU law.”

“Late last year the European Court of Justice ruled that parts of the act – often informally referred to as the snoopers’ charter – were in contradiction of European law. In response to this, the government has put forward a number of alterations and additions.”
