All EU member states except Malta, Denmark and the UK have signed up to work together on a set of 17 collaborative defence projects. One of these includes creating cyber raid response teams to deal with emerging threats.

The European Commission has intervened in an ongoing case between the US Government and Microsoft to ensure that the US Department of Justice correctly understands the EU's data protection laws.

European telecommunications ministers have agreed to the EU's roadmap for the development of the 5th generation mobile networks. The roadmap sets out the ambition of having 5G in large cities and along transport routes in every European country by 2025.

Huawei, the Chinese tech giant has been banned from bidding on Government contracts in the United States over concerns that Beijing is using the equipment for espionage. In Europe, however, Huawei is set to deliver the next generation 5G network technology.

The US President, Donald Trump has voiced his objection to a provision in the Defence Policy Bill which limits funding for the White House Communications Agency, "contingent upon the submission of a report on a national policy for cyberspace, cybersecurity, and cyberwarfare."

The US Army has launched a new programme with the aim of recruiting civilians with technology and cybersecurity skills, in a drastic attempt to strengthen the US cyber force.

A new Artificial Intelligence Research Centre will be opened in China by Google. The aim of developing artificial intelligence has been strongly supported by the Chinese Government but has largely restricted its use to state-owned companies.

The Chinese Government has announced its intention to create a national cybersecurity industrial park. The announcement comes as part of its plan to
enhance its big data strategy and contribute significantly to the Chinese economy.

Sergei Lavrov, Russia’s Foreign Minister, has suggested that the Organisation for Security and Cooperation in Europe should increase its efforts on internet safety. The call from the Minister follows huge allegations by other nations of Russia cyberattacks and interference.

Liberia has suggested that, with help from more advanced nations, they can achieve great advancements in the technological and cybersecurity sector. The Foreign Minister, Marjon Kamara, believes that internet and technology will be key to the nations success in growing its economy.

As part of its aim of increasing internet access and connectivity, Kenya’s mobile network operator, Safaricom, has revealed its intention to expand its 4G network to all 47 counties in Kenya. The news comes just three years after 4G was rolled out in the country.

The Deputy Secretary of NATO, General Rose Gottemoeller has announced that NATO will help support cyber technology and security in the Moldovan education system by offering courses in universities.

Russia calls on OSCE states to ramp up cyber security efforts

Sergei Lavrov, Russia’s Foreign Minister, has suggested that the Organisation for Security and Cooperation in Europe should increase its efforts on internet safety. The call from the Minister follows huge allegations by other nations of Russia cyberattacks and interference.

“Russia’s foreign minister called on Organization for Security and Cooperation in Europe (OSCE) countries to strengthen efforts to ensure the safety of the internet on Thursday.

“Moscow faces widespread allegations that it interfered in the U.S. presidential election and was behind a wave of destructive global hacking attacks. It has denied any involvement in either.”
CrowdStrike

2017 Cyber Intrusion Services Casebook

CrowdStrike Researchers reported that malware-free or fileless attacks are on the rise as the lines between nation-state sponsored attacks and eCrime threat actors are blurred.

“Several key trends emerged from the incident response (IR) cases the CrowdStrike Services team handled on behalf of clients this past year. The team’s case summaries and statistics show vividly how resourceful and relentless sophisticated attackers can be as they continually look for gaps in clients’ IT infrastructure. Organizations should realize:”

“The lines between nation-state sponsored attack groups and eCrime threat actors continue to blur. Secondly, Self-propagation techniques have added a new twist to ransomware attacks and their ability to paralyze clients’ operations.”

NATO

NATO and the European Union deepen cooperation on cyber defence

European Union officials have met with their counterparts at NATO’s Headquarters to discuss further cooperation on cyber defence.

“We reviewed our progress on enhancing information exchange, training and education, and exercises, while identifying new areas where more can be done – such as the sharing of best practice on crisis management and response,” stated Dr. Jamie Shea, NATO’s Deputy Assistant Secretary General for Emerging Security Challenges.

The officials discussed recent developments related to NATO’s Cyber Defence Pledge and the implementation of NATO’s decision to recognise cyberspace as a domain of operations, in addition to the new EU cybersecurity ‘package’.

German spy chief warns of Chinese cyber infiltration effort

Hans-Georg Maassen, the Head of Germany’s domestic intelligence agency, Bfiv has warned that Chinese intelligence agencies are hacking into networks and
targeting European businesses and officials. Maasen has stated that so far over 10,000 Germans have been affected.

“The head of Germany’s domestic intelligence agency, BfV, said Sunday that Chinese intelligence agents are using LinkedIn to target European officials and businesses, The Associated Press reported Sunday.”

“Hans-Georg Maassen said more than 10,000 Germans have been targeted by Chinese agents posing as consultants, headhunters or researchers, mainly through the professional networking site.”

11.12.17

European Commission

**European Commission welcomes first operational steps towards a European Defence Union**

All EU member states except Malta, Denmark and the UK have signed up to work together on a set of 17 collaborative defence projects. One of these includes creating cyber raid response teams to deal with emerging threats.

“The European Commission welcomes the decision adopted today by the Council formally establishing Permanent Structured Cooperation (PESCO) and the plans presented by 25 EU Member States to work together on a first set of 17 collaborative defence projects.”

“President Juncker said: “In June I said it was time to wake up the Sleeping Beauty of the Lisbon Treaty: permanent structured cooperation. Six months later, it is happening. I welcome the steps taken today by Member States to lay the foundations of a European Defence Union.”
