The Indonesian Minister of Communications said that new technology to search internet content and issue alerts for harmful materials has blocked more than seventy thousand websites it has deemed ‘inappropriate.’

According to the Internet and Mobile Association of India & Kantar IMRB the number of internet users in India will reach half a billion by June this year, however, it remains a largely male dominated sphere.

Researchers, students and teachers across five Indian institutes of Technology are joining forces to get involved in a Department of Telecommunications-backed project which aims to develop 5th generation mobile networks technology.

The United Nations Secretary General Antonio Guterres has urged for global rules and a regulatory scheme to be created for cyberwarfare.

The UK and United States Government have publicly blamed Russia for the NotPetya ransomware attacks in June 2017.

Facebook has lost a Belgian privacy case which means the social media giant could face fines of up to $125 million if it fails to stop tracking people on third party websites.

Addressing the SC Congress, Peter Brown, Group Manager at the Information Commissioner’s Office warned that it will now become a ‘legal minimum’ to be compliant with the forthcoming GDPR regulations.

The United States Department for Energy is creating an office solely dedicated to protecting the countries national power grid and other infrastructure against cyber-attacks.

Intel have announced that shareholders and customers have filed thirty-two class action lawsuits against the technology company after security flaws were discovered in their microchips.
Dmitry Peskov, Kremlin’s spokesman has publicly denied that Russia was involved or responsible for the ‘NotPetya’ cyber attacks last year.

According to a new report, North Korea is expanding the sophistication and scope of its cyber weaponry to commit cyber espionage on a large scale.

Australia’s Notifiable Data Breaches scheme mandates that the Australian Government and other organisations must notify individuals that are affected by data breaches that will result in serious harm.

The European Internet Forum has published a document on the future partnership between the EU and the USA which urged for more clarity on the expanding sphere of data policy.

*67% of organisations say they’re understaffed to handle cybersecurity*

According to a survey by cybersecurity company RiskIQ, 67% of US and UK information security organisations do not have enough staff to handle cybersecurity threats.

“There is almost no question that cybercrime is growing in sophistication and distribution every year.”

“For instance, you can go straight to the horse’s mouth with nearly 90 percent of all information security leaders revealing they’re concerned with the rise of digital threats they are facing across web, social, and mobile channels.”

U.N. chief urges global rules for cyber warfare

The United Nations Secretary General Antonio Guterres has urged for global rules and a regulatory scheme to be created for cyberwarfare.

“U.N. Secretary General Antonio Guterres called on Monday for global rules to minimize the impact of electronic warfare on civilians as massive cyber-attacks look likely to become the first salvoes in future wars.”

“Computer hackers, many of them believed to be state-sponsored groups, last year disrupted multinational firms, ports and public services on an unprecedented scale around the world, raising awareness of the issue.”

EU tells Facebook, Google and Twitter to do more for users

On Thursday last week, Europe’s Justice Commissioner, Vera Jourova, told Google and Facebook to do more to bring their user terms in line with EU Law, after the technology companies faced scrutiny over privacy issues.

“Europe's justice commissioner told Facebook, Twitter and Google on Thursday to do more to bring their user terms in line with EU law, saying proposals submitted by the tech giants were considered insufficient.”

“The European Union executive and consumer protection authorities said the three companies have only partially addressed concerns about their liability and how users were informed about content removal or contract terminations.”

SC Congress 2018 Security best practices needed to stay in line with GDPR

Addressing the SC Congress, Peter Brown, Group Manager at the Information Commissioner’s Office warned that it will now become a ‘legal minimum’ to be compliant with the forthcoming GDPR regulations.
“It’s not enough to do the minimum necessary now with enforcement of new rules less than 100 days away. With GDPR coming into force less than 100 days, organisations need to make sure they are using best practices for security now.”

“With GDPR coming into force less than 100 days, organisations need to make sure they are using best practices for security now to ensure they comply with forthcoming regulations, rather than meeting the bare minimum that current rules enforce, delegates heard at the SC Congress in London.”

US Democrats push US$1 billion bill for election security

Congressional Democrats have introduced a Bill that if passed would allocate one billion dollars to make the US voting system cyber resilient.

“Congressional Democrats on Wednesday introduced legislation that would provide more than US$1 billion to boost cyber security of U.S. voting systems, and Vice President Mike Pence defended the administration’s efforts to protect polls from hackers.”

“The measure followed warnings on Tuesday from U.S. intelligence officials that midterm races in November are likely to see renewed meddling from Russia and possibly other foreign adversaries.”

U.S. Energy Department forming cyber protection unit for power grids

The United States Department for Energy is creating an office solely dedicated to protecting the countries national power grid and other infrastructure against cyber-attacks.

The U.S. Department of Energy (DOE) said on Wednesday it is establishing an office to protect the nation’s power grid and other infrastructure against cyber-attacks and natural disasters.

President Donald Trump’s budget proposal unveiled this week included $96 million in funding for the Office of Cybersecurity, Energy Security, and Emergency Response.
67% of organisations say they're understaffed to handle cybersecurity

According to a survey by cybersecurity company RiskIQ sixty-seven per cent of US and UK information security organisations do not have enough staff to handle cybersecurity threats.

“There is almost no question that cybercrime is growing in sophistication and distribution every year.”

“For instance, you can go straight to the horse’s mouth with nearly 90 percent of all information security leaders revealing they’re concerned with the rise of digital threats they are facing across web, social, and mobile channels.”

Intel hit with 32 lawsuits over security flaws

Intel have announced that shareholders and customers have filed thirty-two class action lawsuits against the technology company after security flaws were discovered in their microchips.

“Intel Corp said on Friday shareholders and customers had filed 32 class action lawsuits against the company in connection with recently-disclosed security flaws in its microchips.”

“Most of the lawsuits - 30 - are customer class action cases that claim that users were harmed by Intel’s “actions and/or omissions” related to the flaws, which could allow hackers to steal data from computers.”

EU tells Facebook, Google and Twitter to do more for users

On Thursday last week, Europe’s Justice Commissioner told Google and Facebook to do more to bring their user terms in line with EU Law, after the technology companies faced scrutiny over privacy issues.
“Europe's justice commissioner told Facebook, Twitter and Google on Thursday to do more to bring their user terms in line with EU law, saying proposals submitted by the tech giants were considered insufficient.”

“The European Union executive and consumer protection authorities said the three companies have only partially addressed concerns about their liability and how users were informed about content removal or contract terminations.”

**Facebook forges ahead with kids app despite expert criticism**

Facebook is pressing ahead with its messaging app designed for children, despite widespread concern that it could lure kids into harmful social media use.

“Facebook is forging ahead with its messaging app for kids, despite child experts who have pressed the company to shut it down and others who question Facebook's financial support of some advisers who approved of the app.”

“Messenger Kids lets kids under 13 chat with friends and family. It displays no ads and lets parents approve who their children message. But critics say it serves to lure kids into harmful social media use and to hook young people on Facebook as it tries to compete with Snapchat or its own Instagram app. They say kids shouldn't be on such apps at all _ although they often are.”
N.Y. judge says Charter must face lawsuit over slow internet

Charter Communications an American telecommunications company has been accused of providing customers with slower than advertised internet speeds and is now facing a lawsuit by New York’s Attorney General.

“Charter Communications Inc must face a lawsuit by New York’s attorney general accusing the cable company of giving customers slower-than-advertised internet speeds, a New York state judge ruled in a decision made public on Friday.”

“Justice O. Peter Sherwood of state Supreme Court in Manhattan rejected Charter’s claim that Attorney General Eric Schneiderman failed to plausibly allege it had short-changed and misled customers. He also rejected Charter’s claim that federal law pre-empted the lawsuit.”
