China has announced that they are likely to license fifth generation mobile technology to telecom carriers by the second half of 2019.

During an inaugural ASEAN-Australia Summit, Australia and the Association of Southeast Asian Nations (ASEAN) agreed to cooperate closer on issues such as cybersecurity.

The Dubai Future Foundation, a network of global partners signed a partnership agreement with nine global firms including internet giants Facebook and Microsoft to support the One Million Arab Coders initiative by providing training opportunities, internships, infrastructure and tech jobs for the Arab youth.

A warning has been issued by twenty-eight European Heads of State over claims that data analytics firm Cambridge Analytica illegally used the information of fifty million Facebook users to influence the US elections and the Brexit referendum vote.

The European Commission have announced they are planning to apply tougher consumer protection laws to social media network Facebook and email provider Gmail so that they can better regulate them if they misuse personal data.

The UK government have unveiled a new strategy to help UK cybersecurity firms to sell their products and services overseas. According to the Department for International Trade five key export markets have been identified, these include the US, Singapore, the Gulf, India and Japan.

The United States have announced a $400 million Federal Government Spending Bill to be used to purchase secure voting machines and improve election cybersecurity training.

Internet giant Facebook could be faced with massive fines after failing to protect the personal data of users from the data analytics firm Cambridge Analytica who illegally used that information to influence the US elections.
US lawmakers have sent a letter to US Ambassador Geronimo Gutierrez in Mexico urging him to probe into an investigation in which the Mexican Government are accused of using spyware intended for surveillance of terrorists to track human rights lawyers, activists and journalists.

Telecommunications firm, Swift Networks said they will provide ten thousand internet hotspots to Lagos between now and the next six months.

The Nigerian Government are failing to utilise a $408 million internet access fund to be spent on increasing internet connectivity and access opportunities in Nigeria.

A new joint cybersecurity centre has opened in Australia which aims to improve the cybersecurity of businesses in all sectors and the Australian Government by creating a trusted environment where they can share information on cyber threats and develop collaborative solutions.

The five-day Mobile Learning Week event started last week addressed the digital skills required to create a connected global economy and society with experts in the field.

**New EU tax on tech giants’ revenue is not ‘anti-US’, Moscovici insists**

EU Commissioner, Pierre Moscovici said the new taxation system that will see large digital companies paying 3% will affect several American technology companies however this is about ‘fairness’ and it is not an ‘anti-US tax.’

“After half a year of intense debate and bickering between member states, the European Commission proposed on Wednesday (21 March) a new system for taxing digital companies that will charge large firms 3% of their revenue.”

“The EU executive said it will affect between 120 and 150 companies—and half of those are American tech giants. The plan also sparked immediate backlash from American tech companies.”

**EU plans to pull ‘free’ digital services under consumer protection rules**

The European Commission have announced they are planning to apply tougher consumer protection laws to social media network Facebook and email provider Gmail so that they can better regulate them if they misuse personal data.

“Digital services that collect users’ data, like Facebook and Gmail, will be pulled under EU consumer protection rules as part of a European Commission overhaul due next month. Possible sanctions will be raised to up to 4% of a company’s turnover.”

“A major overhaul of EU consumer rules is set to extend the bloc’s existing laws to services that collect users’ data as payment instead of money, according to a leaked draft of the proposal that EURACTIV has obtained.”
EU heads of state issue warning over Facebook data case

A warning has been issued by twenty-Eight European Heads of State over claims that data analytics firm Cambridge Analytica used the information of fifty million Facebook users to influence political campaigns. They all agreed that it was of paramount importance that data was protected.

“The 28 EU heads of state issued a warning shot on Thursday (22 March) over allegations that 50 million Facebook users’ data was harvested without their consent to influence political campaigns.”

“Social networks and digital platforms need to guarantee transparent practices and full protection of citizens’ privacy and personal data,” read conclusions from the leaders’ discussion at a European Council summit in Brussels.”

Chancellor of the exchequer announces UK fintech strategy

Philip Hammond the UK Chancellor of the Exchequer has unveiled the UK’s first financial technology (fintech) strategy which will see the creation of a cryptocurrency taskforce and new industry standards to make it easier and cheaper for companies to partner with existing banks.

“The government has outlined its plans to support the financial technology industry in the UK.”

“The UK government has announced its strategy for the financial technology (fintech) sector, which will attempt to create an environment in which fintech firms can prosper.”

Mayor of London kick-starts drive to make city top for AI

The Mayor of London Sadiq Khan has commissioned a new study on companies providing artificial intelligence (AI) to address the opportunities the technology poses and maximise the positive impact that AI will have on the UK economy.

“London mayor Sadiq Khan commissions a study to look at improving the capital’s readiness for artificial intelligence.”
“The mayor of London, Sadiq Khan, has put his name behind a study that seeks to raise the profile of the use of artificial intelligence (AI) in the city.”

France and Estonia strengthen digital cooperation

France and Estonia have both signed an agreement to deal with cybersecurity related issues together and share the technical solutions used to combat the threats.

“Paris and Tallinn have signed an e-government agreement to combat cyberattacks and develop the digital economy. EURACTIV’s partner La Tribune reports.”

“There are three chapters to the agreement signed on March 19 by Mounir Mahjoubi, French Secretary of State in charge of Digital Affairs, and Urve Palo, Estonian Minister of Entrepreneurship and Information Technology: digital governance, digital economy, and cybersecurity. It also mentions the possibility of “sharing existing technical solutions”, “organising [joint] events”, setting up “pilot projects” and increasing “expert visits”. Each country will have to appoint an advisor by the end of the month.”

**Security industry reacts to UK police cyber-crime budget revelations**

A new report called Policing and Cybercrime has revealed that the UK police force spend a merger £1.3 million on cyber-crime training in the last three years.

“As UK police forces are revealed to have spent just £1.3 million on cyber-crime training in the last three years, security industry response is damning.”

“A freedom of information request enabled Parliament Street to determine that cyber-crime training expenditure by UK police forces is shamefully low. How low might that be? Well the ‘Policing and Cybercrime’ report revealed that in terms of cyber-crime training budgets the total spend across all forces that responded, including the British Transport Police and Ministry of Defence Police Service, was just £1,320,341 spread across the last three years.”

**$408m Internet access funds idle in Nigeria, others**

The Nigerian Government are failing to utilise a $408 million internet access fund to be spent on increasing internet connectivity and access opportunities in Nigeria.

“About $408 million expected to help Nigeria, and other sub-Saharan African (SSA) countries expand Internet access and reach on the Continent, is said to be lying idle. The fund is otherwise known as Universal Service and Access Funds (USAFs).”

“USAFs are communal public funds dedicated to expanding Internet connectivity and access opportunities for the populations and other underserved communities who are least likely to be connected through market forces alone.”

**Samsung set to enhance learning with School in a Box**

Technology company Samsung Electronics in South Africa have created the ‘School in a Box’ solution, a tablet which encompasses digital learning programmes to deal with the digital skills gap.

“Anyone entering the workforce today must have at the very least a basic knowledge of technology and how to navigate a digital world.”

“Depending on the industry or type of job, the level of knowledge required differs.”
University of Cape Town now offers FinTech short course for business

The University of Cape Town have announced that they are now offering short courses on Financial Technology (FinTech) for businesses to address the skills gap.

“According to the recent Finnovating for Africa report released by media and research company Disrupt Africa, Africa is already home to more than 300 Fintech startups, having raised almost $100 million over the last 2.5 years. But the industry is crying out for skilled professionals who understand the technology and are able to capitalise on its potential.”

“So says Dr. Co-Pierre Georg, Associate Professor at the African Institute of Financial Markets and Risk Management (AIFMRM) at UCT and convener of a brand new course on Facing the Fintech Challenge at the UCT Graduate School of Business (GSB).”
Mobile Learning Week 2018 to focus on digital skills needed to live, work and learn in a connected world

The five-day Mobile Learning Week event started last week addressed the digital skills required to create a connected global economy and society with experts in the field.

“Mobile Learning Week 2018 takes place 26-30 March in Paris, France, under the theme "Skills for a connected world".

“Organized by the United Nations Education, Scientific and Cultural Organization (UNESCO) in partnership with the International Telecommunication Union (ITU), the five-day event will examine the digital skills needed to create a connected global economy and society. It will also focus on opportunities to leverage information and communication technologies (ICTs) towards expanded educational opportunities for all.”
