Hong Kong announces new immigration pilot program for tech professionals

Hong Kong have announced a new immigration scheme which will make it easier and faster for the admission of overseas talent to help the countries technology sector.

“To meet the demand for new talent in the innovation and technology sector, the Hong Kong Government introduced the Technology Talent Admission Scheme (TechTAS) on 8 May 2018 to provide a fast-track arrangement for the admission of overseas research and development talent.”

“Tenants and incubatees of the Hong Kong Science and Technology Parks Corporation (HKSTPC) and Hong Kong Cyberport Management Company Limited (Cyberport) that are engaged in the areas of biotechnology, artificial intelligence, cybersecurity, robotics, data analytics, financial technologies, and material science are currently eligible under this pilot program. The program will later be extended to successful technology companies and institutes who will be given quotas to bring in foreign talent.”

Shortage of talent hits chipmakers

It has been reported that there is a shortage of chipmakers in China. In 2017 there were 300,000 employees working in the integrated circuit industry however China needs more than 400,000 by 2030 to fill the gap.

“China is expected to fill the large talent shortage in its domestic computer chip industry, as the US ban on sales of electronic products to smartphone maker ZTE underscores China's overreliance on imported chips, experts say.”
“To achieve its goal, China will need to invest heavily in research, craft more favorable policies for Chinese chipmakers and attract more high-end foreign talent, experts said.”
