Telecom Regulatory Authority of India, TRAI have said that they are willing to ‘step in’ if there is any anti-competitive behaviour between the mobile phone companies. In a statement they said, ‘a four-player market is fairly healthy and offers a competitive environment. But if it is anti-competitive or predatory, we’ll step in.”

The fifth World Internet Conference forum was held on November 7-9th in the Wuzhen, Zhejiang province. Several topics were discussed including, FinTech and Construction of a Social Credit System, the Future of Internet, The Internet of Things: Towards a Connected World, AI and bridging the digital divide.

Telecom Regulatory Authority of India, TRAI have asked for expert advice on whether to impose regulations on communication apps such as WhatsApp, Skype and Viber on grounds of national security.

In six months’, time, EU Member States will be freely sharing non-personal data, including artificial intelligence and machine learning across the EU, after the European Union Council approved a regulation, to take effect in six months that would make this a reality. The new rules will also ban, “data localization restrictions imposed by member states on the geographical location for storing or processing non-personal data, unless such restrictions are justified on grounds of public security.’

A new International Cybersecurity Arrangement has been signed by more than 50 nations, including the UK and 130 groups such as Microsoft, Facebook and LinkedIn. While the agreement is not legally binding, it creates a national standard for cybersecurity and cyber warfare, human rights and curbing election manipulation. Among other countries, the United States, Russia and China failed to sign the agreement.

European Union Agency for Network and Information Security (ENISA), the European Defence Agency (EDA) and the Computer Emergency Response Team for the EU Institutions, Agencies and Bodies (CERT-EU) met last week
and agreed to work closer and share more information in regards to cybersecurity.

The United States congressional advisory panel has advised the country to not purchase internet-linked devices manufactured in China because it could potentially leave the US exposed to security breaches.

Internet giant Facebook has teamed up with North West-based Agent Academy and The Extraordinary Club, a company involved in promoting the creative industries, to deliver certified digital skills training in the North West of England as part of the platform’s Community Boost Programme. As part of the programme, Facebook is also partnering with Freeformers, a training provider, to offer to upskill 75,000 people across the EU in UK, France, Germany, Poland, Italy and Spain. The training will be for individuals between the ages of 18 and 30 that have little or strong digital skills.

According to the Digital Rights in Africa report by Paradigm Initiative, African Governments are passing legislation that harms digital rights and restricts the freedom of expression of citizens. The report mentions eight countries across North, East, West and Central Africa including, Egypt, Morocco, Nigeria and Benin for being the main culprits of this.

The Chartered Institute of Bankers in Nigeria have announced plans to reorganise the curriculum so banking personnel get more training that meets to standards of FinTech’s and prepares them for the technology revolution.

According to Andrew Vogues, Threat Prevention Sales Leader, Middle East & Africa, at Checkpoint, a leading provider of cybersecurity solutions said Nigeria needs to take ‘cybersecurity challenges seriously’ as the attacks continue to rise.

According to Prof. Paul Theron, an Advisor to the European Commission and member of NATO’s cybersecurity research group claims that 50,000 more cyber experts will be needed to deal with the state-sponsored cyber espionage from Russia.

Government considering dedicated internet regulator, says digital minister

According to Margot James, the UK Digital Minister, the Department for Digital, Culture Media and Sport are looking to create a body solely dedicated to regulating the internet because the current system is failing.

“Digital minister Margot James has told the House of Lords Communications Committee that the Department for Digital, Culture, Media and Sport (DCMS) is likely to recommend the creation of some form of dedicated regulatory body for the internet in the next few months.”

“Giving evidence to the ongoing Lords inquiry on internet regulation, James said that at the moment, some aspects of online activity were regulated by a number of different bodies, such as telecoms regulator Ofcom, the Advertising Standards Agency (ASA) and the Information Commissioner’s Office (ICO), and this approach was no longer viable.”

Britain needs a 50,000-strong cyber army to protect against prolific Russian hackers, warns Nato adviser

According to Prof Paul Theron, an Advisor to the European Commission and member of NATO’s cybersecurity research group claims that 50,000 more cyber experts will be needed to deal with the state-sponsored cyber espionage from Russia.

“Britain will be wide-open to state-sponsored hacking of its critical infrastructure - including its energy supply - for the next decade because of a shortage of 50,000 cyber-security specialists, a top Nato adviser has warned.”
“Prof Paul Theron, a member of Nato’s cyber-security research group and an advisor to the European Commission, said Britain urgently needed to bolster its defences against what he called a now “constant” barrage of sophisticated attacks from state-sponsored and criminal organisations against power stations, electricity networks and other essential systems.”

LinkedIn CEO Jeff Weiner Says the Biggest Skills Gap In the U.S. Is Not Coding

Chief Executive of LinkedIn, Jeff Weiner, has said the biggest skills gap in the US is for soft skills such as written communication, oral communication and leadership skills, instead of coding, which is what is commonly thought.

“Ask anyone which professional skill is most in demand right now, and they’ll likely say coding. But ask LinkedIn CEO Jeff Weiner, and he’ll give you a different answer.”

“As head of the world’s largest professional-networking site, Weiner presumably has access to more, and more detailed, employment information than any government. He knows what jobs people post, what jobs people have, and what jobs people want. And the biggest skills gap he says he sees in the United States is soft skills.”
