

IEEE Internet Inclusion Connectivity and Energy Working Group

Expanding Internet & Energy Access

Objectives	Work Plan Action Items	Lead	Deliverables	Status/Date
Develop analysis of energy and internet access projects – what factors seem to drive success?	List of projects and case studies on internet access and energy projects, such as dig once experiences, alternative energy based access, etc.	Sonia Jorge/Alliance for Affordable Internet		
Identify policies that encourage both increased access to energy and internet – what works best? Do they increase efficiency?	Lead creation of a list of policies that encourage internet and energy access.	Garland McCoy		
Identify organizations, companies and other groups interested in engaging on the intersection of internet and energy.	Lead creation of a list of relevant entities.	Nilmini Rubin/Tetra Tech		
Do literature search of papers/reports that highlight the need and recommendations for increasing both energy and internet access.	Lead literature search of papers/reports that highlight the need and recommendations for increasing both energy and internet access. All members should contribute info.	Bai Blyden/IEEE		
Facilitate group communication.	Research IEEE shared drive/communications policy to help us figure out how the working group can work together	Tim Lee/IEEE
