

IEEE Internet Inclusion Evidence-based Research Working Group

Conduct, compile and disseminate data-driven research to help advance connectivity around the world

Objectives	Action Items	Deliverables	Status/Date
Compile database of connectivity initiatives	Search public databases, online sources, and conduct interviews to solicit connectivity initiatives Catalog these initiatives by stakeholder group, technology, region etc.	V2 available here: https://docs.google.com/spreadsheets/d/19InM_yecvFDeVZiK1s9KfzHF_ADLthFqqh4B7letWo/edit?usp=sharing	Complete
Compile case studies on connectivity initiatives on both the supply side and demand side	Conduct semi-structured interviews, and combine with desk research, to compile case studies	70 case studies available on 1worldconnected.org 30 pending signed consent; will be released shortly	Ongoing; scheduled to be completed by June 2018
Synthesize case study learnings	Group case studies by region and domain Write policy-relevant briefs summarizing high-level learnings	Policy briefs (8-10)	Ongoing; scheduled to be completed by September 2018
Disseminate learnings widely	Compile list of potential audiences, including the international finance and policy community Compile list of venues and reach out to them	List of venues and audiences being compiled; would appreciate help from IIAS on suggestions for potential venues/people	Ongoing
